Decolonization-Jan C. Jansen 2019-06-11 A concise and accessible history of decolonization in the twentieth century The end of colonial rule in Asia, Africa, and the Caribbean was one of the most important and dramatic developments of the twentieth century. In the decades after World War II, dozens of new states emerged as actors in global politics. Imperial regimes collapsed, some more or less peacefully, others amid mass violence. This book takes an incisive look at decolonization and its long-term consequences, revealing it to be a coherent yet multidimensional process at the heart of modern history. Jan Jansen and Jürgen Osterhammel provide a comparative perspective on the decolonization process, shedding light on its key

aspects while taking into account the unique regional and imperial contexts in which it unfolded. They examine the economic repercussions of decolonization and its impact on international power structures, its consequences for envisioning world order, and the long shadow it continues to cast over new states and former colonial powers alike.

Commerce and Government-Etienne Bonnot Abb Condillac 2008-02 This text covers such topics as value, money, agriculture, domestic and foreign trade, war, labor, interest rates, luxuries, and the various government policies that affect these subjects. The theme that unites these disparate subjects is liberty. As Condillac writes near the end of the work, the means to eradicate all the abuses and injustices of government is "to give trade full, complete and permanent freedom." In their preface to the 1997 edition, Shelagh and Walter Eltis wrote, "English language readers . . . will find . . . that the case for competitive market economics has rarely been presented more powerfully." Étienne Bonnot, Abbé de Condillac (1714-1780) was one of eighteenth-century France's preeminent philosophers of the Enlightenment, who had wide-ranging influence beyond metaphysics and epistemology to political thought and economics. He was a leading advocate in France of the ideas of John Locke, Bishop George Berkeley, and David Hume. Shelagh Eltis is a historian and graduate of Somerville College, Oxford, U.K. Walter Eltis is an Emeritus Fellow of Exeter College, Oxford, and Visiting Professor of Economics at the University of Reading, U.K.

American Government-Glen Krutz 2018-01-07 Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and

arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

Taking Religion Seriously Across the Curriculum-Warren A. Nord 1998 The authors chart a middle course in our war over religion and public education, one that builds on a developing national consensus among educational and religious leaders. While it is not proper for schools to practice religion or proselytize, neither is it permissible to make them religion-free zones. Schools do not take religion seriously, as the authors' review of textbooks and the new national content standards makes clear. In Part One, they outline the civic, constitutional, and educational frameworks that should shape the treatment of religion in the curriculum and classroom. In Part Two, they explore major issues relating to religion in different domains of the curriculum in

elementary education and in middle and high school courses in history, civics, economics, literature, and the sciences. They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education.
