Managing Copyright in Higher Education-Donna L. Ferullo 2014-10-30

As more and more colleges and universities establish copyright offices and/or assign the responsibilities of copyright education and advisory services to specific individuals within the institution, many times librarians, there is a paucity of resources available on how to manage that responsibility. Most works on copyright discuss the law and court cases interpreting the law but few address the situational application of it and the management and coordination of copyright efforts on a campus. Here is a complete, one-stop, guide to managing copyright at all levels—community college, college, and university. Complete chapters are devoted to: The university culture The role of a copyright office How to establish a copyright office Copyright services for librarians Copyright services for faculty Copyright services for administrators and staff Copyright services for students Written by the director of the University Copyright Office at Purdue University who holds both law and library science degrees, this is complete, authoritative guide is a must-purchase for every institution of higher education seeking to comply with the copyright law and thus avoid potential liability exposure.

Biology-Sylvia Mader 2015-01-09 THE MADER/WINDELSPECHT STORY...

The twelfth edition of Biology is a traditional, comprehensive introductory biology textbook, with coverage from Cell Structure and Function to the Conservation of Biodiversity. The book, which centers on the evolution and diversity of organisms, is appropriate for any one- or two-semester biology course. Biology, 12th Edition is the epitome of Sylvia Mader's expertise. Its concise, precise writing-style employs lucid language to present the material as succinctly as possible, enabling students—even non-majors—to master the foundational concepts before coming to class. “Before You Begin”, “Following the Themes”, and “Thematic Feature Readings” piece together the three major themes of the text—evolution, nature of science, and biological systems. Students are consistently engaged in these themes,

revealing the interconnectedness of the major topics in biology. Sylvia Mader typifies an icon of science education. Her dedication to her students, coupled with her clear, concise writing-style has benefited the education of thousands of students over the past three decades. The integration of the text and digital world has been achieved with the addition of Dr. Michael Windelspecht's facility for the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University—a program that enrolls over 4,500 non-science majors annually. Michael is the lead architect in the design of McGraw-Hill's Connect Plus and LearnSmart media content for the Mader series. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both online and traditional environments, and assess the learning objectives and outcomes of the course.
