Lake Tahoe's Railroads-Stephen E. Drew 2016-09-12 Lake Tahoe is the majestic mountain lake that spans the boundary line of California and Nevada. The lake's clarity and scenic beauty are legendary. In the 1870s, the Nevada Comstock Lode created an insatiable appetite for Lake Tahoe's virgin pine forests. The timbers would shore up underground mining and build communities approaching 40,000 inhabitants. Railroads on three shores delivered the logs lakeside, where they were towed by steam-powered tugs to sawmills, to lumber flumes, and again by rail to their final destinations. As the mines and giant lake pines subsided, railroads pushed farther north after 1898 into new timber stands in the Lake Tahoe and Truckee River basins. Other rail lines were sold, barged across the lake, and repurposed for the burgeoning new industry of tourism. For the next 40 years, railroads marketed Lake Tahoe as their unique scenic destination.

Turn this Water Into Gold-John M. Townley 1977

Not Going Gently-Constance L. Vincent, Ph.d. 2014-09-25 A poignant mother-daughter memoir, Not Going Gently fuses story and science together into a unique book. Constance L. Vincent, PhD, shares her mother's personal experience living with Alzheimer's, intertwined with her own professional research into the disease. Striving to use her skills to protect her mother's mental and emotional health, Dr. Vincent must cope with the fact that she is too late to stop the disease. And as she learns how to care for her ailing parent, she can't help comparing her own age-related memory changes with her mother's. But instead of allowing loss and fear to claim victory over her future, Dr. Vincent chooses love and hope as she educates herself on the disease and studies the latest research. While most books about Alzheimer's focus on only one aspect of the disease from either a scientific or personal perspective, this book expertly melds the two in an all-inclusive portrait of the disease. And it not only honestly addresses this devastating illness that affects millions of people and their loved ones, but also offers hope through groundbreaking prevention plans. There are two different paths of aging—and you can choose which one you take.

The Mathematician's Shiva-Stuart Rojstaczer 2014 " A comic, bittersweet tale of family evocative of The Yiddish Policemen's Union and Everything Is Illuminated Alexander "Sasha" Karnokovitch and his family would like to mourn the passing of his mother, Rachela, with modesty and dignity. But Rachela, a famous Polish e;migre; mathematician and professor at the University of Wisconsin, is rumored to have solved the million-dollar, Navier-Stokes Millennium Prize Problem. Rumor also has it that she spitefully took the solution to her grave. To Sasha's

chagrin, a ragtag group of socially challenged mathematicians arrives in Madison and crashes the shiva, vowing to do whatever it takes to find the solution—even if it means prying up the floorboards for Rachela's notes. Written by a trained geophysicist, this hilarious and multi-layered debut novel brims with colorful characters and brilliantly captures humanity's drive not just to survive, but to solve the impossible"--

Shakespearean Allusion in Crime Fiction-Lisa Hopkins 2016-04-21 This book explores why crime fiction so often alludes to Shakespeare. It ranges widely over a variety of authors including classic golden age crime writers such as the four 'queens of crime' (Allingham, Christie, Marsh, Sayers), Nicholas Blake and Edmund Crispin, as well as more recent authors such as Reginald Hill, Kate Atkinson and Val McDermid. It also looks at the fondness for Shakespearean allusion in a number of television crime series, most notably Midsomer Murders, Inspector Morse and Lewis, and considers the special sub-genre of detective stories in which a lost Shakespeare play is found. It shows how Shakespeare facilitates discussions about what constitutes justice, what authorises the detective to track down the villain, who owns the countryside, national and social identities, and the question of how we measure cultural value.

100 Plus-Sonia Arrison 2011-08-23 Humanity is on the cusp of an exciting longevity revolution. The first person to live to 150 years has probably already been born. What will your life look like when you live to be over 100? Will you be healthy? Will your marriage need a sunset clause? How long will you have to work? Will you finish one career at sixty-five only to go back to school to learn a new one? And then, will you be happily working for another sixty years? Maybe you'll be a parent to a newborn and a grandparent at the same time. Will the world become overpopulated? And how will living longer affect your finances, your family life, and your views on religion and the afterlife? In 100 Plus, futurist Sonia Arrison takes us on an eye-opening journey to the future at our doorsteps, where science and technology are beginning to radically change life as we know it. She introduces us to the people transforming our lives: the brilliant scientists and genius inventors and the billionaires who fund their work. The astonishing advances to extend our lives—and good health—are almost here. In the very near future fresh organs for transplants will be grown in laboratories, cloned stem cells will bring previously unstoppable diseases to their knees, and living past 100 will be the rule, not the exception. Sonia Arrison brings over a decade of experience researching and writing about cutting-edge advances in science and technology to 100 Plus, painting a vivid picture of a future that only recently seemed like science fiction, but now is very real. 100 Plus is the first book to give readers a comprehensive understanding of how life-extending discoveries will change our social and economic worlds. This illuminating and indispensable text will help us navigate the thrilling journey of life beyond 100 years.

The Global Rise of Authoritarianism in the 21st Century-Berch Berberoglu 2020-09-23 Neoliberal globalization is in deep crisis. This crisis is manifested on a global scale and embodies a number of fundamental contradictions, a central one of which is the global rise of authoritarianism and fascism. This emergent form of authoritarianism is a right-wing reaction to the problems generated by globalization supported and funded by some of the largest and most powerful corporations in their assault against social movements on the left to prevent the emergence of socialism against global capitalism. As the crisis of neoliberal global capitalism unfolds, and as we move to the brink of another economic crisis and the threat of war, global capitalism is once again resorting to authoritarianism and fascism to maintain its power. This book addresses this vital question in comparative-historical perspective and provides a series of case studies around the world that serve as a warning against the impending rise of fascism in the 21st century.

Building a Better Teacher: How Teaching Works (and How to Teach It to Everyone)-Elizabeth Green 2014-08-04 A New York Times Notable Book "A must-read book for every American teacher and taxpayer." —Amanda Ripley, author of *The Smartest Kids in the World* Launched with a hugely popular New York Times Magazine cover story, *Building a Better Teacher* sparked a national conversation about teacher quality and established Elizabeth Green as a leading voice in education. Green's fascinating and accessible narrative dispels the common myth of the "natural-born teacher" and introduces maverick educators exploring the science behind their art. Her dramatic account reveals that great teaching is not magic, but a skill—a skill that can be taught. Now with a new afterword that offers a guide on how to identify—and support—great teachers, this provocative and hopeful book "should be part of every new teacher's education" (Washington Post).

Consensus and Synchronization in Complex Networks-Ljupco Kocarev 2013-01-18 In this book for the first time two scientific fields - consensus formation and synchronization of communications - are presented together and examined through their interrelational aspects, of rapidly growing importance. Both fields have indeed attracted enormous research interest especially in relation to complex networks. In networks of dynamic systems (or agents), consensus means to reach an agreement regarding a certain quantity of interest that depends on the state of all dynamical systems (agents). Consensus problems have a long history in control theory and computer sciences, and form the foundation of the field of distributed computing. Synchronization, which defines correlated-in-time behavior between different processes and roots going back to Huygens to the least, is now a highly popular, exciting and rapidly developing topic, with applications ranging from biological networks to mathematical epidemiology, and from processing information in the brain to engineering of communications devices. The book reviews recent finding in both fields and describes novel approaches to consensus formation, where consensus is realized as an instance of the nonlinear dynamics paradigm of chaos synchronization. The chapters are written by world-known experts in both fields and cover topics ranging from fundamentals to various applications of consensus and synchronization.

3D Construction Modeling-Dennis Fukai 2004 This book, and interactive video CD, is a learner centered graphic narrative teaching Sketch Up 4.0 3D modeling software for design and construction professionals: architects, contractors and students. Forecasting the Environmental Fate and Effects of Chemicals-Philip S. Rainbow 2001-05-25 *Forecasting the Environmental Fate and Effects of Chemicals* is the first book to address specifically the issue of forecasting in environmental toxicology and chemistry from a methodological, regulatory and practical perspective. It is becoming increasingly important for environmental toxicologists and chemists to be able to forecast the fate and effects of chemicals by using existing information to predict the future. Providing a unique and timely opportunity for active researchers and students to obtain in a single volume the 'state of the art' in this expanding field, this text discusses how forecasts can be made by: * using ecotoxicological endpoints at different levels of biological organisation * measuring and modelling chemical fate in biotic and abiotic environments * adopting difference quantitative frameworks Written by an international team of scientists, this text will be essential reading for postgraduate and advance undergraduate students studying ecotoxicology, toxicology, chemistry and environmental statistics aswell as industrial and academic research scientists in environmental toxicology, environmental chemistry and those involved in risk management.

The Highlanders of Scotland-William F. Skene 1837

When the Well Runs Dry-Thomas H. Green 2007 Builds on Green's classic and bestselling primer on prayer *Opening to God*. This work encourages readers to re-examine their perspectives on prayer and argues that prayer has less to do with what readers do or know and more to do with what God does in them.

Everyday Life Practices of Muslims in Europe-Erkan Toğuşlu 2015-08-18 Muslims in Europe and the preservation of their religious-ethnic particularities Everyday Life Practices of Muslims in Europe explores how Muslims give meaning to Islam on a day-to-day basis. The contributions look at concrete practices, identities, memories, and normalities in daily Muslim life and provide insights to the complexities of identities. They examine Muslims' use of and construction of spaces, daily practices, forms of interaction, and modes of thinking in different areas, resulting in a thorough analysis and framework of Muslims' day-to-day life through topical chapters on food, space, entertainment, marriage, and mosque, covering both extent of hybridity and preservation of religious-ethnic particularities. Contributors Rachel Brown (Wilfrid Laurier University), Mohammed El-Bachouti (UPF), Valentina Fedele (Università della Calabria), Diletta Guidi (École Pratique des Hautes Études), Ossame Hegazy (Bauhaus, University, Weimar), Ajmal Hussain (Aston University), Jana Jevtic (Central European University), Elsa Mescoli (University of Liège), Wim Peumans (KU Leuven), Sumeyye Ulu Sametoğlu (EHES), Leen Sterck (The Netherlands Institute for Social Research), Thijl Sunier (VU University Amsterdam), Erkan Toğuşlu (KU Leuven)

An Old-Fashioned Mystery-Runa Fairleigh 2014-04-01 "A timeless delight. The more murder mysteries you have read, the likelier you will relish this one." -- Toronto Globe and Mail "This book might well have been titled THE LAST MYSTERY, since it is most definitely the mystery to end all mysteries." --from the Introduction by L.A.

Morse, Edgar award-winning author of THE OLD DICK Ten guests have gathered at an isolated summer estate amid the Thousand Islands. The occasion is a surprise party to celebrate Rosa Sill's 25th birthday, the day she inherits the family fortune. But one surprise awaits them: the party quickly turns to a case of murder. Violet Cornichon, the Society-Girl Detective, is on-hand, and it is up to her to gather all the clues and point them toward the suspects...or is that the potential victims. Because the killer is hardly finished with his deadly night, with bodies turning up, murdered in terrible and brutal ways. Which begs the old-fashioned question: whodunit?

Black Plumes-Margery Allingham 2016-07-21 The slashing of a valuable painting at the renowned Ivory Gallery in London, one of the most prestigious art galleries in the world - followed by the murder of the proprietor's son-in-law, Robert, sets the stage for another finely tuned Allingham mystery. The proprietor's mother, 90-year-old Gabrielle Ivory, holds the key to the web of intrigue and danger that permeates the gallery. Gabrielle Ivory was once a society beauty. But now, nearing 90, she's largely disregarded by the younger members of the Ivory clan, who like to imagine Granny as rather a relic of a dead era. That's a mistake, and it's not their only one. A series of malicious attacks is threatening the Ivory Gallery in London. Robert Ivory and his high-strung wife, frantic to preserve the status-quo, want to chalk it all up to practical jokes gone wrong. But Gabrielle is not inclined to collude in this delusion. A brilliant standalone mystery from the author of the beloved Campion books. Golden Age Crime at its intriguing best.

The Image of Georgian Bath, 1700-2000-Peter Borsay 2000 This interdisciplinary study explores the evolution, structure, and uses of the image of Georgian Bath, from its genesis in the eighteenth century to its renaissance in the twentieth century. In recent decades there has been both a popular resurgence of interest in heritage and tradition, and a growing academic awareness of the power of imagery in shaping the lives of individuals and societies. There is perhaps no city in Britain so saturated in history and layered with historic imagery as Bath. It therefore provides an ideal case-study to investigate the dynamic fusion and impact of the forces of past and representation. The dominant perception of Bath today is that of a classical and particularly Georgian city. In this stimulating and scholarly study, Peter Borsay examines the construction and development of this image. Its principal components, biography and architecture, are explored, together with the media through which it was constructed and transmitted, as well as its commercial, social, political, and psychological uses. Dr Borsay concludes by relating the findings for Bath to current debates on towns, heritage, and the nature of history.

Death in a White Tie-Ngaio Marsh 1977-09-01 No one is more popular on London's champagne-and-caviar circuit than charming Lord Gospell. However, on the morning after the year's most glittering ball, someone finds a reason to asphyxiate "Bunchy" Gospell in a taxi headed across town. Scotland Yard's Inspector Roderick Alleyn is called in to find out who killed his old friend, and to cleverly unwind a tangle of murky secrets that began far from the ballroom floor.
