**The Jewish Ghetto and the Visual Imagination of Early Modern Venice**-Dana E. Katz 2017-08-31 Dana E. Katz examines the Jewish ghetto of Venice as a paradox of urban space. In 1516, the Senate established the ghetto on the periphery of the city and legislated nocturnal curfews to reduce the Jews' visibility in Venice. Katz argues that it was precisely this practice of marginalization that put the ghetto on display for Christian and Jewish eyes. According to her research, early modern Venetians grounded their conceptions of the ghetto in discourses of sight. Katz's unique approach demonstrates how Venice's Jewish ghetto engaged the sensory imagination of its inhabitants in complex and contradictory ways that both shaped urban space and reshaped Christian-Jewish relations.

**Beethoven**-William Kinderman 2009-04-10 Combining musical insight with the most recent research, William Kinderman's Beethoven is both a richly drawn portrait of the man and a guide to his music. Kinderman traces the composer's intellectual and musical development from the early works written in Bonn to the Ninth Symphony and the late quartets, looking at compositions from different and original perspectives that show Beethoven's art as a union of sensuous and rational, of expression and structure. In analyses of individual pieces, Kinderman shows that the deepening of Beethoven's musical thought was a continuous process over decades of his life. In this new updated edition, Kinderman gives more attention to the composer's early chamber music, his songs, his opera Fidelio, and to a number of often-neglected works of the composer's later years and fascinating projects left incomplete. A revised view emerges from this of Beethoven's aesthetics and the musical meaning of his works. Rather than the conventional image of a heroic and tormented figure, Kinderman provides a more complex, more fully rounded account of the composer. Although Beethoven's deafness and his other personal crises are addressed, together with this ever-increasing commitment to his art, so too are the lighter aspects of his personality: his humor, his love of puns, his great delight in juxtaposing the exalted and the commonplace.

**The Challenge for Africa**-Wangari Maathai 2009-04-07 In this groundbreaking work, the Nobel Peace Prize-winner and founder of the Green Belt Movement offers a new perspective on the troubles facing Africa today. Wangari Maathai, the author of Unbowed, sees things differently, and here she argues for a moral revolution among Africans themselves. Illuminating the complex and dynamic nature of the continent, Maathai offers "hardheaded hope" and "realistic options" for change and improvement. She deftly describes what Africans can and need to do for themselves, stressing all the while responsibility and accountability. **Who Was Louis Armstrong?**-Yona Zeldis McDonough 2004-12-29 If not for a stint in reform school, young Louis Armstrong might never have become a musician. It was a teacher at the Colored Waifs Home who gave him a cornet, promoted him to band leader, and saw talent in the tough kid from the even tougher New Orleans neighborhood called Storyville. But it was Louis Armstrong's own passion and genius that pushed jazz into new and exciting realms with his amazing, improvisational trumpet playing. His seventy-year life spanned a critical time in American music as well as black history.

**Key to Health**-Mohandas Gandhi 2017-06-10 Health Tips for You From Mahatma Gandhi Written by the iconic world leader, Mahatma Gandhi, this booklet is full of little tips on how you can get a better body and health. Originally written in Gujarati, an Indian language, it is now available in English and several European languages. Gandhi gave it the name "Key to Health", and he told, to paraphrase him, that anyone follows the tips and guidelines in the booklet would have a power key to an optimal health. And that the person doesn't have to spend time shuttling between home and hospital. This is much like "prevention is better than cure," as well as "you can always get a better health when you come near to nature" Some aspects covered in the book:Human body Fresh Air Brahmacharya Tea Pure Water Natural and Well-chosen Food Coffee Intoxicants Tobacco Condiments Be with nature and be natural is the essence of this little book from this great man. Some excerpts from the book:1. The human body is composed of what the ancient philosophers have described as the five elements. These are earth, water, vacancy, light and air. 2. The body has been described as a mine of dirt. Looked at in its proper perspective, there is no exaggeration in this statement. If the body was nothing else but this, there could be no point in taking such pains to look after it. But if this so-called mine of dirt can be put to its proper use, it becomes our first duty to cleanse it and keep it in a fit condition. 3. Hip bath brings down the temperature in high fever and given in the manner described above it never does any harm, and may do much good. It relieves constipation and improves digestion. The patient feels fresh and active after it. In cases of constipation, Kuhne advises a brisk walk for half an hour immediately after the bath. It should never be given on a full stomach. An Indirect Benefit: You also get to learn, at certain places, how India was at the time. Personally, you can draw from this a valuable inspiration as well: If some people from a country that was so tough to live at the time, could succeed, you too can. In one place Mahatma Gandhi, mentions this: "But everybody cannot afford to drink milk. And milk is not available in every place. I would like to mention here a very important fact with regard to milk. Contrary to the popular belief, skimmed milk is a very valuable article of diet." Not even milk was available to many by then! With better conditions, you can reach much higher stations in your life. This booklet is a very quick read. Scroll Up and Get Your Copy.

**Forest Cover Change in Space and Time**-Arild Angelsen 2007 This paper presents a framework for analyzing tropical deforestation and reforestation using the von Thunen model as its starting point: land is allocated to the use which yields the highest rent, and the rents of various land uses are determined by location. Forest cover change therefore becomes a question of changes in rent of forest versus non-forest use. While this is a simple and powerful starting point, more intriguing issues arise when this is applied to analyze real cases. An initial shift in the rent of one particular land use generates feedbacks which affect the rent of all land uses. For example, a new technology in extensive agriculture should make this land use more profitable and lead to more forest clearing, but general equilibrium effects (changes in prices and local wages) can modify or even reverse this conclusion. Another issue is how a policy change or a shift in broader market, technological, and institutional forces will affect various land use rents. The paper deals with three such areas: technological progress in agriculture, land tenure regimes, and community forest management. The second part of the paper links the von Thunen framework to the forest transition theory. The forest transition theory describes a sequence over time where a forested region goes through a period of deforestation before the forest cover eventually stabilizes and starts to increase. This sequence can be seen as a systematic pattern of change in the agricultural and forest land rents over time. Increasing agricultural rent leads to high rates of deforestation. The slow-down of deforestation and eventual reforestation is due to lower agricultural rents (the economic development path) and higher forest rent (the forest scarcity path). Various forces leading to these changes are discussed and supported by empirical evidence from different tropical regions.

**At Loggerheads?**-Piet Buys 2007 The report offers a simple framework for policy analysis by identifying three forest types: frontiers and disputed lands; lands beyond the agricultural frontier; and, mosaic lands where forests and agriculture coexist. It collates geographic and economic information for each type that will help formulate poverty-reducing forest policy.

**Biodiversity and Pest Management in Agroecosystems, Second Edition**-Miguel Altieri 2004-01-27 Explore the latest research on biological control! Completely updated for 2004, this new edition examines methods for making agricultural systems less susceptible to insect pests. Containing new findings and reports of strategies, Biodiversity and Pest Management in Agroecosystems, Second Edition will show you how pests can be managed by enhancing beneficial biodiversity using agroecological diversification methods. Biodiversity and Pest Management in Agroecosystems, Second Edition provides you with an essential overview of the role of biodiversity in agriculture and then gets specific, with new and updated information on: the agroecology of pest management plant diversity and pest outbreaks within agroecosystems diversification strategies for pest management how sustainable farming systems are designed You'll also explore: the role of plant diversity on the biology of beneficial insects insect regulation in diverse agroecosystems manipulation of plant diversity in agroecosystems ecological and socioeconomic implications The fact is, many modern agroecosystems are unstable as a consequence of constant human intervention in crop systems which ignore ecological principles. With case studies on a variety of crops and pests, Biodiversity and Pest Management in Agroecosystems, Second Edition explores entomological aspects of agriculture and analyzes the ecological basis for the maintenance of biodiversity. It will familiarize you with the theory and practice of enhancing biological pest control in agricultural systems by managing vegetational diversity via multiple cropping, cover cropping, rotations, and other spatial and temporal designs. With studies on intercropping, cover cropping, weed management, and crop-field border vegetation manipulation, this book covers the effects of these diverse systems on pest population density and the mechanisms underlying pest reduction in polycultures. **The Unkechaug Indians of Eastern Long Island**-John A. Strong 2013-02-14 Few people may realize that Long Island is still home to American Indians, the region's original inhabitants. One of the oldest reservations in the United States—the Poospatuck Reservation—is located in Suffolk County, the densely populated eastern extreme of the greater New York area. The Unkechaug Indians, known also by the name of their reservation, are recognized by the State of New York but not by the federal government. This narrative account—written by a noted authority on the Algonquin peoples of Long Island—is the first comprehensive history of the Unkechaug Indians. Drawing on archaeological and documentary sources, John A. Strong traces the story of the Unkechaugs from their ancestral past, predating the arrival of Europeans, to the present day. He describes their first encounters with British settlers, who introduced to New England's indigenous peoples guns, blankets, cloth, metal tools, kettles, as well as disease and alcohol. Although granted a large reservation in perpetuity, the Unkechaugs were, like many Indian tribes, the victims of broken promises, and their landholdings diminished from several thousand acres to fifty-five. Despite their losses, the Unkechaugs have persisted in maintaining their cultural traditions and autonomy by taking measures to boost their economy, preserve their language, strengthen their communal bonds, and defend themselves against legal challenges. In early histories of Long Island, the Unkechaugs figured only as a colorful backdrop to celebratory stories of British settlement. Strong's account, which includes extensive testimony from tribal members themselves, brings the Unkechaugs out of the shadows of history and establishes a permanent record of their struggle to survive as a distinct community.

**Mutual Causality in Buddhism and General Systems Theory**-Joanna Macy 2010-03-29 This book brings important new dimensions to the interface between contemporary Western science and ancient Eastern wisdom. Here for the first time the concepts and insights of general systems theory are presented in tandem with those of the Buddha. Remarkable convergences appear between core Buddhist teachings and the systems view of reality, arising in our century from biology and extending into the social and cognitive sciences. Giving a cogent introduction to both bodies of thought, and a fresh interpretation of the Buddha's core teaching of dependent co-arising, this book shows how their common perspective on causality can inform our lives. The interdependence of all beings provides the context for clarifying both the role of meditative practice and guidelines for effective action on behalf of the common good.

**Agricultural Bioinformatics**-Kavi Kishor P.B. 2014-07-14 A common approach to understanding the functional repertoire of a genome is through functional genomics. With systems biology burgeoning, bioinformatics has grown to a larger extent for plant genomes where several applications in the form of protein-protein interactions (PPI) are used to predict the function of proteins. With plant genes evolutionarily conserved, the science of bioinformatics in agriculture has caught interest with myriad of applications taken from bench side to in silico studies. A multitude of technologies in the form of gene analysis, biochemical pathways and molecular techniques have been exploited to an extent that they consume less time and have been cost-effective to use. As genomes are being sequenced, there is an increased amount of expression data being generated from time to time matching the need to link the expression profiles and phenotypic variation to the underlying genomic variation. This would allow us to identify candidate genes and understand the molecular basis/phenotypic variation of traits. While many bioinformatics methods like expression and whole genome sequence data of organisms in biological databases have been used in plants, we felt a common reference showcasing the reviews for such analysis is wanting. We envisage that this dearth would be facilitated in the form of this Springer book on Agricultural Bioinformatics. We thank all the authors and the publishers Springer, Germany for providing us an opportunity to review the bioinformatics works that the authors have carried in the recent past and hope the readers would find this book attention grabbing.

**Farmers' Crop Varieties and Farmers' Rights**-Michael Halewood 2016-03-21 Over the last 50 years there has been a growing appreciation of the important role that farmers play in the development and conservation of crop genetic diversity, and the contribution of that diversity to agro-ecosystem resilience and food security. This book examines policies that aim to increase the share of benefits that farmers receive when others use the crop varieties that they have developed and managed, i.e., 'farmers varieties'. In so doing, the book addresses two fundamental questions. The first question is 'how do farmer management practices - along with other factors such as environment and the breeding systems of plants - affect the evolution and maintenance of discrete farmers' varieties?' The second question is 'how can policies that depend on being able to identify discrete plant varieties accommodate the agricultural realities associated with the generation, use and maintenance of farmers' varieties?' This focus on discreteness is topical because there are no fixed, internationally recognized taxonomic or legal definitions of farmers' varieties. And that presents a challenge when developing policies that involve making specific, discrete farmers' varieties the subject of legal rights or privileges. The book includes contributions from a wide range of experts including agronomists, anthropologists, geneticists, biologists, plant breeders, lawyers, development practitioners, activists and farmers. It includes case studies from Asia, Africa, Latin America and Europe where, in response to a diversity of contributing factors, there have been efforts to develop policies that provide incentives or rewards to farmers as stewards of farmers' varieties in ways that are sensitive to the cultural, taxonomic and legal complexities involved. The book situates these initiatives in the context of the evolving discourse and definition of 'farmers' rights', presenting insights for future policy initiatives.

**Will Eisner: Champion of the Graphic Novel**-Paul Levitz 2015-11-10 Will Eisner (1917-2005) is universally considered the master of comics storytelling, best known for The Spirit, his iconic newspaper comic strip, and A Contract With God, the first significant graphic novel. This seminal work from 1978 ushered in a new era of personal stories in comics form that touched every adult topic from mortality to religion and sexuality, forever changing the way writers and artists approached comics storytelling. Noted historian Paul Levitz celebrates Eisner by showcasing his most famous work alongside unpublished and rare materials from the family archives. Also included are original interviews with creators such as Jules Feiffer, Art Spiegelman, Scott McCloud, Jeff Smith, Denis Kitchen, and Neil Gaiman—all of whom knew Eisner and were inspired by his work to create their own graphic novels for a new generation of readers. NOTE: The cover is a high-quality photographic reproduction of Eisner's original art. The design intentionally reveals tape and other stray markings that are part of the artist's

process and reflect the age of the artifact that was photographed.

**Writing Scientific Research Articles**-Margaret Cargill 2011-09-13 "Margaret Cargill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling, well documented, clear narratives that convey their work honestly and in proper context, they have succeeded admirably." Veterinary Pathology, July 2009 "[The book is] clearly written, has a logical step-by-step structure, is easy to read and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing." Aquaculture International, April 2009 Writing Scientific Research Articles: Strategy and Steps guides authors in how to write, as well as what to write, to improve their chances of having their articles accepted for publication in international, peer reviewed journals. The book is designed for scientists who use English as a first or an additional language; for research students and those who teach them paper writing skills; and for early-career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments, as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at [www.writersresearch.com.au](http://www.writersresearch.com.au) for more information.

**English for Research Publication Purposes**-Karen Englander 2019-02-28 Scholars who use English as an additional language confront challenges when disseminating their research in the global market of knowledge production dominated by English. English for Research Publication Purposes analyses the experiences and practices of these scholars across the globe and presents "critical plurilingual pedagogies" as a theoretically and empirically informed means of supporting them. This book: • Draws on an empirical study of a Latin American university's effort to mount a course that provides support to emerging and established scholars who use English as an additional language; • Brings theoretically informed discussions of critical pedagogies, plurilingualism and identity affirmation to better serve plurilingual scholars who seek to publish their research in English-language journals; • Provides examples of classroom activities that can be adapted and adopted to local contexts and realities in a curriculum based on critical plurilingual pedagogies; • Proposes future directions for research into the internationally urgent, growing concerns of global scholars who produce English-medium academic knowledge for the world stage. Incisive and cutting-edge, English for Research Publication Purposes will be key reading for academics and upper-level students working in the areas of ESP, EAP, ERPP, and Applied Linguistics.

**Overhaul**-Steven Rattner 2010-09-13 A uniquely informed investigative account of one of the biggest financial crises of President Obama's early administration During his first year in office, President Obama faced the possibility of more than a million lost jobs as GM and Chrysler headed for financial ruin. He joined forces with Treasury Secretary Tim Geithner and economic advisor Larry Summers in a historic government intervention to keep these two auto-industry giants afloat, working against a ticking clock and fielding vocal opposition from free market champions along the way. It's from this vantage point that former New York Times financial journalist Steven Rattner witnesses a new administration's grace under pressure in the face of gross corporate mismanagement—a scenario rich in hard-earned lessons for managers and executives in any industry.

Agriculture and Agri-Food Canada 1997 The strategy presented in this paper is intended to provide decision makers in the agriculture and agri-food sector with useful tools and information to help make the sector's environmental performance a factor that enhances its growth prospects rather than limits them. The strategy follows four directions: improving the capacity of decision makers to integrate environmental considerations in daily management on a proactive basis; promotion of stewardship and sustainable use of the environment and agricultural resource base; focusing of research, development, and technology transfer to address environmental challenges and foster sustainability in the sector; and encouragement of marketing and trade that promote environmental quality and sustainability. For each strategic direction, priorities for action are described. Includes glossary and a profile of Agriculture & Agri-Food Canada.
